

Network tariffs and service fees

Small customers | 1 MAY 2023

The network service fee covers the following services:

- We transfer electrical energy from the production plant to the customer
- We meter electricity consumption and production
- We are responsible for the round-the-clock outage service of network operations
- We take care of network upgrades and maintenance

The electricity network services contract can be terminated in accordance with the terms of network service.

Good to know about electricity tax

In connection with the network service fee, electricity tax is charged and remitted to the state. Electricity tax includes the electricity excise duty and the strategic stockpile fee. All customers are automatically included in electricity tax category 1, unless they have reported otherwise. Companies operating in the manufacturing industry, mining industry, excavation or professional greenhouse cultivation sectors can be in electricity tax category 2, among others. A written declaration on the operations in tax category 2 must be sent to the network company.

Electricity tax (cent/kWh)	VAT 0%	VAT 24%
Tax category 1	2.253	2.79372
Tax category 2	0.063	0.07812

Fuse-based distribution tariffs

The selected product can be exchanged for another product once a year.

General electricity

The product is suitable for customers who mostly use electricity during the daytime. The form of heating is usually other than electricity. The distribution fee remains the same day and night throughout the year. The general electricity product is also applied to temporary use of electricity, for example occasions and events.

Distribution fee (cent/kWh)	VAT 0%	VAT 24%	Basic fee according to the main fuse (EUR/month)	VAT 0%	VAT 24%
Distribution	4.53	5.62	1 x 25 A* and 1 x 35 A*	9.65	11.96
Electricity tax, category 1	2.253	2.79372	3 x 25 A**	17.13	21.24
Distribution inclusive of electricity tax	6.79	8.41	3 x 35 A	29.57	36.67
			3 x 50 A	55.47	68.78
			3 x 63 A	74.10	91.89
			3 x 80 A	114.48	141.96
			3 x 100 A	134.98	167.38

* 1-phase premises, where there are at least three premises behind one connection (e.g. blocks of flats and terraced houses). All other 1-phase premises are included in the 3 x 25A main fuse group.

** All 3-phase premises under 3 x 25A are included in the 3 x 25A main fuse group.

Night-time electricity

The product is suitable for customers who have electric heating or electricity storage-heating devices. The distribution fee is lower during night-time.

Distribution fee (cent/kWh)	VAT 0%	VAT 24%	Basic fee according to the main fuse (EUR/month)	VAT 0%	VAT 24%
Distribution day (7 am–10 pm)	3.49	4.33	3 x 25 A	29.76	36.90
Distribution night (10 pm–7 am)	2.13	2.64	3 x 35 A	49.69	61.62
Electricity tax, category 1	2.253	2.79372	3 x 50 A	79.95	99.14
Distribution inclusive of electricity tax day (7 am–10 pm)	5.74	7.12	3 x 63 A	117.73	145.98
Distribution inclusive of electricity tax night (10 pm–7 am)	4.38	5.43	3 x 80 A	177.38	219.95
			3 x 100 A	215.34	267.02

Seasonal electricity

The product is suitable for customers who can supplement electric heating with other alternatives during wintertime. The distribution fee is lower all summer and during the nights and on Sundays in the wintertime.

Distribution fee (cent/kWh)	VAT 0%	VAT 24%	Basic fee according to the main fuse (EUR/month)	VAT 0%	VAT 24%
Distribution winter weekday (1 Nov–31 Mar Mon–Sat 7 am–10 pm)	4.28	5.31	3 x 25 A	35.40	43.90
Distribution all other times	2.13	2.64	3 x 35 A	64.60	80.10
Electricity tax, category 1	2.253	2.79372	3 x 50 A	95.45	118.36
Distribution inclusive of electricity tax winter weekday (1 Nov–31 Mar Mon–Sat 7 am–10 pm)	6.54	8.10	3 x 63 A	131.37	162.90
Distribution inclusive of electricity tax all other times	4.38	5.43	3 x 80 A	198.19	245.76
			3 x 100 A	232.40	288.18

Electricity connection maintenance fees

Will be charged if the Customer wants to disconnect the electricity supply and keep the connection contract valid or if the Customer has not made a contract for electricity supply within 3 months after the completion of electricity connection.

Maintenance fee (EUR/month)	VAT 0%	VAT 24%
Maintenance fee ≤ 3 x 63 A connections	14.02	17.39
Maintenance fee > 3 x 63 A connections	118.67	147.15

Distribution of production

This product is used in places where electricity is produced. Surplus electricity produced to the distribution network is subject to a distribution fee, with the exception of power plants with a nominal power of less than 50 kVA, which are not subject to a distribution fee. Surplus electricity must always have a buyer.

Production distribution fee (EUR/MWh)	VAT 0%	VAT 24%	Own consumption (EUR/MWh)**	VAT 0%	VAT 24%
Distribution, distribution network, production < 1 MVA*	0.7	0.87	Own consumption, distribution network, production < 1 MVA winter weekday (1 Dec–28 Feb Mon–Fri 7 am–9 pm)	0.00	0.00
			Own consumption, distribution network, production < 1 MVA all other times	0.00	0.00

* If the nominal power of the power plant is less than 50 kVA, no distribution fee will be charged.

** Fees for own consumption are determined in accordance with the valid Fingrid price list. Last updated 1 January 2022. 'Own consumption' refers to the share of energy that is consumed behind the connection point and that is not fed into the electricity network. 'Own consumption' does not refer to a power plant's own electricity consumption.

Service fees

	VAT 0%	VAT 24%
Removal, transfer or inspection of the metering device (main fuse capacity ≤ 3 x 63 A) (EUR)	129.03	160
Removal, transfer or inspection of the metering device (main fuse capacity ≥ 3 x 80 A) (EUR)	201.61	250
Removal or transfer of an additional meter from a multi-metering panel (starting from the fourth meter) (EUR)	44.35	55
Service visit (EUR)	100.81	125
Payment reminder (VAT 0%) (EUR)	5	-
Disconnection or reconnection of electricity supply (EUR)	44.35	55
Disconnection of electricity supply during debt collection (VAT 0%) (EUR)	55	-
Investigation report at the customer's request (EUR/h)	32.26	40
Certificate of electricity usage (EUR)	8.06	10
Electricity consumption report for energy certificate (EUR/site)	20.16	25
Control visit due to a fault in the customer's devices (EUR)	100.81	125
Electrician's hourly rate (EUR/h)	52.42	65
Locating a cable, quick location (EUR)	177.42	220
Copy of Invoice	4.84	6

Free services

- Installation of a metering device
- Change of distribution tariff once per year
- Advice on tree felling close to electricity lines
- Advice on the location of underground cables
- Advice on electricity use
- Resolving quality of supply problems
- Meter reading when moving or changing electricity supplier
- Connection of electricity in conjunction with removal during office hours; at other times, according to the service fees. Reconnection must be ordered by 1pm on weekdays
